

Compact in size,  
big on features.

TOSHIBA  
PLAIN PAPER COPIER

BD-3503

TOSHIBA

# A plain paper copier that goes beyond the limits of limited office space.

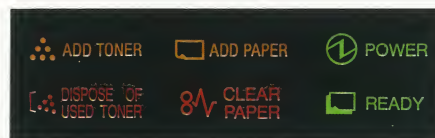

## Flexible dual cassette system

This compact copier offers features which until now were found only on full-sized more expensive models. At the flick of a switch you have a choice of two paper sizes. And the range of paper sizes handled by the

BD-3503 extends from B 4 to A 5 (legal to statement) while the capacity for each cassette is a generous 22 sheets.

## Microprocessor control

The BD-3503 is simple to operate – designed with the user in mind. The built-in-microprocessor does just about every-

thing for you – auto toner control for consistent quality copies; toner “Empty” indicator; constant paper feed monitoring – with a paper misfeed indicator lamp; a paper supply refill warning lamp; and automatic cut-off when something needs checking.

## Compact heat roller system

TOSHIBA has equipped the BD-3503 with advanced systems normally found on larger, more expensive copiers. Copies are therefore delivered fast, crisp and clean as TOSHIBA has

engineered the BD-3503 with same features and HEAT ROLLER SYSTEM technology used in high volume copiers.

## Compact yet efficient

The small physical size of the BD-3503 is no indication of its great potential. In addition to plain paper, the BD-3503 makes excellent copies on your company letterhead and even colored stocks. Copies are always crisp and clear. Three dimensional objects such as books can be copied from. If required, the copier can be set on a desk, or other convenient area.

## Auto-toner system

The BD-3503 automatically adjusts toner density – a better way of delivering excellent reproduction of your originals consistently. For an occasional light or dark original just push the “Darken” or “Lighten” button, – the BD-3503 automatically does the rest.

## Easy operation

Simply key in the number of copies required on the digital keyboard, from 1 to 99, press the start button and in almost no time at all, your copies appear in the tray. Crisp, clean and dry. And ready to write on.

Desk is not included
